Subject: Omni VI->PK232 hook up

Help would be appreciated.

I would like to hook up my PK232 to my Omni VI using the FSK mode. If anyone has successfully done this, I would greatly appreciate the details. In my 232 manual it says something about needing a resistor for this mode.. but may be outdated or not apply to the Omni VI.. but want to make sure.

I believe that the FSK mode is best for PACTOR, RTTY.. it was on my Kenwood 850 because you then could use the filters. I have purchased the digital filter for the VI and want to make sure I can use it.

thanks in advance for any help
